Did You Know?

Today is National Kids Take Over the Kitchen Day!

Kids and teens across the country are called to take over their kitchens on this day using their favorite recipes and make a meal for their family! (Adult supervision and assistance is required for the younger bakers and chefs in the house!)

- In ancient times doctors used spiderwebs to make bandages for their patients.
- In Laguna, Brazil, dolphins help fishermen to catch fish. The dolphins round up the fish and signal the fishermen to cast their nets. More than 200 families rely on the daily catch.
- The South American fish "Pacu" is the world's only fish that eats nuts. It's jaws are so powerful that it can crack open nuts underwater.
